What We Do

Nine focused service lines — each one a real capability we build and ship, not a slide-deck promise.

AI Automation Agency

We design and build production AI automation for businesses that are drowning in manual, repetitive work — support, data entry, reporting, follow-ups — and want it handled by reliable systems instead of more headcount.

Business Process Automation

We map, streamline, and automate the operational workflows that eat your team's time — so work moves itself instead of waiting on someone to push it forward.

Custom Software Development

When SaaS almost fits but forces you to bend your business around it, we build software that fits you — internal tools, portals, and platforms designed around your real workflows.

Web Development

We build websites and web apps that do a job: rank, load fast, and convert. Not brochures — growth assets, engineered for performance and search from day one.

Mobile App Development

We build cross-platform mobile apps that feel native, ship on one codebase, and are backed by infrastructure that won't fall over when you grow.

UI/UX Design

We design interfaces that feel effortless and convert — grounded in real UX principles and a design system, not just a pretty mockup that breaks in build.

n8n Automation

We design, build, and host production n8n workflows — so you get powerful, AI-ready automation you actually own, without bleeding money on per-task automation SaaS.

AI Chatbot Development

We build AI chatbots and support agents grounded in your actual content — policies, docs, product data — so they answer accurately, escalate cleanly, and cut your support load.

CRM Automation

We turn your CRM from a place data goes to die into an engine — capturing, enriching, routing, and following up automatically so your team spends time selling, not updating fields.

How We Work

A short, proven loop — get something real live fast, then expand once it's proven.

1

Discover

We audit the workflow, product, or market and find the highest-leverage place to start.

2

Design

We design the solution around how your business actually works, not a generic template.

3

Build

We ship a working first version fast, on your real stack, with proper guardrails.

4

Support

We monitor, tune, and extend the system as your business evolves.

Industries We Serve

Deep enough in each vertical to know the real constraints — compliance, trust, margin, retention.

● Healthcare software

● FinTech software

● E-commerce automation

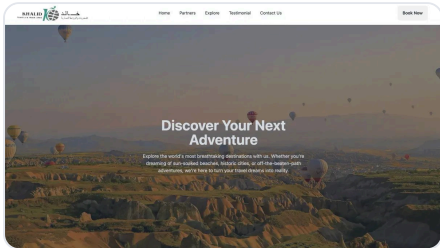

● Real estate software

● Logistics automation

● Fitness apps

Selected Work

A sample of projects delivered for clients across three countries.

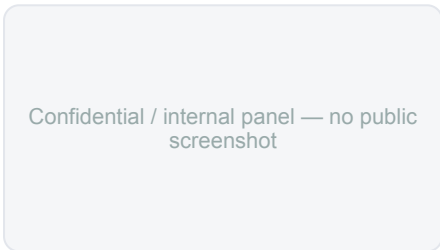

Khalid Travels & Tradelinks

Saudi Arabia

A leading Saudi-Arabia-based travel agency. We delivered seamless flight booking, personalized holiday packages, expert visa workflows, and 24/7 customer support — every journey, hassle-free.

Travel Tourism Hospitality

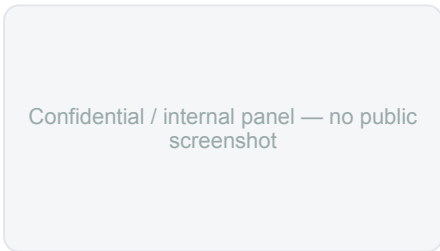

Golden Gymnasium — Admin Panel

India

A robust management platform for Indian fitness centers. Streamlines member registration, attendance, scheduling, payments, and staff coordination with an intuitive dashboard and analytics.

Fitness Admin Panel SaaS

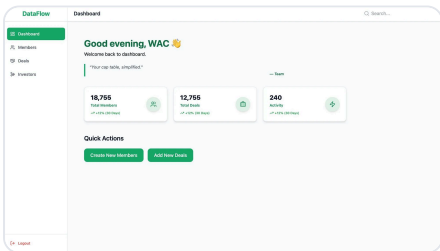

Golden Gymnasium — Landing Page

India

A visually striking, conversion-focused landing page. Dynamic hero, interactive visuals, compelling CTAs, and full membership detail. Optimized for every device.

Fitness Web Design Marketing

Equity Management App

United States

A secure, scalable equity management platform for a confidential US client. Automates equity distribution, cap-table management, and compliance flows. NDA-bound — best-in-class security and UX.

Fintech Equity Management Confidential

In-House Template Library

10 ready-built, industry-specific site templates — used as a fast starting point for new client sites, then customised to the brand. Not off-the-shelf themes; built and maintained in-house.

HOW WE WORK WITH YOU

Remote-first team, async-collaborative across time zones. Every engagement starts with a short discovery call, a working first version shipped fast, then iteration based on real usage — not a fixed scope handed over months later.

Let's build something.

Tell us what you're trying to ship — a product, an automation, a website —
and we'll tell you honestly whether we're the right fit.
